## About the Company

**REMCO INDUSTRIES** is an eminent organization that is engaged in the manufacturing & supply of PVC insulated Wires & Cables. Established in 1976 our organization has grown exponentially over the years nestled in Delhi, the capital of India. we manufacture PVC Insulated Sheathed and Unsheathed Wire & Cables for working voltage up to and included 1100 volts.

**Mr. R.B GUPTA** is the founder person of the organization. His guidance and supervision has proved to be advantageous for the right growth of our organization. With more than a Triple of decades experience in the field of manufacturing of wires & cables, we have acquired reasonable understanding of market requirement and are hence in a position to offer product that satisfactory meets the demand of different clients.

We are an **ISO certified company** which ensures that there is no compromise on quality quotient while manufacturing Cable & Wires that match with the defined quality standards.

Customer satisfaction is our main objective and that can only be achieved with the quality of products that we offer. We follow rigorous quality assurance from raw material procurement to the final stage of production ensures zero defect wires that can be used for effective results.

## Company Values

### CUSTOMERS FOCUS

Passionate in contributing to our customers success by rendering them the best quality service and products in the simplest, quickest and the most economical manner and forging long term partnerships.

### PERFORMANCE COMMITMENT

We perform to win and to be the best. We recognize, celebrate and reward success.

### LONG TERM OUTLOOK

Operating in a dynamic and rapid changing environment, we strive to have the ability to learn, change and adapt.

### PEOPLE POTENTIAL & KNOWLEDGE BASED

We will attract and retain highly effective personnel and provide a knowledge-based environment that will elicit the best from them. We believe our employees are our most important assets and we continually strive to be their employer of choice.

### INNOVATION & CONSTANT CHANGE

We will strive to always be technically ahead of our competitors through innovation, development and acquisition of new technologies

### OPEN ENVIRONMENT

We believe in providing a family friendly and an open environment within our organization that enhances our productivity.

### COMPANY POLICIES

We believe in maintaining sound, stable company operating policies to ensure long-term growth and prosperity for our company, our staff

## Safety for **CONNECTING**

### SINGLE AND MULTICORE ROUND CABLES

Chemical & Oil  
Resistance: Good

Industrial &  
Domestic use

Conductor  
Class II

Max. Service  
Temperature 70°

Electrical  
Panel Wiring

**Applications :** Suitable for use in conduit and for fixed protected insulation. Particularly suitable for wiring in fire and explosion prone areas. chemical factories, densely wired areas, public buildings, schools, hospital, commercial complexes, theaters etc.

**Specification :** Generally conforms to IS:694 IEC: 60332-1, IEC 60754-1 IS:8130 & IS:5831.

Many thin strands of Electrolytic Copper are fine-drawn simultaneously for uniformity of Resistance, Dimension and Flexibility. The Drawn strands are twisted in high precision machines and compacted. This not only imparts circularity to the bunched conductors but also prevents the tendency of the strands to separate and exert internal pressure on the insulation when the cable is bent during installation and usage.

**Colours :** Double strips of Silver Gray or bright orange on base colour Red, Yellow, Blue, Black and Green running along the length of the cable
